

9 July 2012

AMENDMENT TO THE 2010 U.S. CBM RETURN

ERRATUM:

The Erratum concerns the budget of CDC's Office of Infectious Diseases (OID) as it was reported for CY 2010 on Form A, Part 2 (ii) and Form A, Part 2 (iii). Information that the Centers for Disease Control and Prevention (CDC) submitted for the 2010 Confidence Building Measures (CBM) report indicated that CDC's Office of Infectious Diseases (OID) provided a total of \$93,476,605 for national biological defense research and development program purposes in 2010. In the course of preparing the 2011 CBM report, CDC determined that the methodology used for the 2010 report was inconsistent with the methodology used for prior years and the 2011 report. For this reason, CDC has recalculated the 2010 amount using the same methodology that was used for 2011 and the years before 2010 and has determined that the correct funding level in 2010 was \$20,043,719.
