

AMENDMENT TO U.S. CBM RETURNS

The United States endeavors to make its annual BWC CBM returns complete, accurate and transparent. Pursuant to this goal, the U.S. Government (USG) continually works to improve the process by which information is assembled and reviewed for the CBM. When an error is discovered during this process, the USG will amend the relevant CBM return(s).

ERRATA:

1. From 2011 through 2015, entries for Naval Research Laboratory on Forms A, part 2 (iii) contained calculation errors in responses to Question 3, either because BSL-1 laboratory space was inadvertently included in the BSL-2 space reported or because areas were inadvertently reported in square feet instead of square meters. The corrected responses, which should have appeared in answer to Question 3 in each annual CBM from 2011 through 2015, appear in the summary table below.

Naval Research Laboratory (NRL) BSL-2 Floor areas of laboratory areas by containment level (m²), 2011-2015			
CBM Year	Reported BSL-2	Corrected BSL-2	Total laboratory floor area
2015	1,186	558	558
2014	2,816	662	662
2013	2,271	792	792
2012	1,667	944	944
2011	1,305	985	985
