

Revised forms for the submission of the Confidence-Building Measures

At the Third Review Conference it was agreed that all States Parties present the following declaration, later amended by the Seventh Review Conference:

Declaration form on Nothing to Declare or Nothing New to Declare for use in the information exchange

Measure	Nothing to declare	Nothing new to declare	Year of last declaration if nothing new to declare
A, part 1	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="text" value="2016"/>
A, part 2 (i)	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="text" value="2016"/>
A, part 2 (ii)	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>
A, part 2 (iii)	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>
B	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>
C	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>
E	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="text" value="2016"/>
F	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="text" value="2016"/>
G	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>

(Please mark the appropriate box(es) for each measure with a tick, and fill in the year of last declaration in the last column where applicable.)

Date: 20-04-2017

State Party to the Convention: PORTUGAL

Date of ratification/accession to the Convention: 15-05-1975

National point of contact: **Luis Quartin Graça** (Head, Disarmament and Non-Proliferation Division, Ministry of Foreign Affairs), Paula Costa (Non-Proliferation Division), Phone +351 21 394 63 39, Fax +351 21 394 6037, E-mail: dsd@mne.pt; luis.quartin@mne.pt

Active promotion of contacts

The Third Review Conference agreed that States parties continue to implement the following:

"Active promotion of contacts between scientists, other experts and facilities engaged in biological research directly related to the Convention, including exchanges and visits for joint research on a mutually agreed basis."

In order to actively promote professional contacts between scientists, joint research projects and other activities aimed at preventing or reducing the occurrence of ambiguities, doubts and suspicions and at improving international cooperation in the field of peaceful bacteriological (biological) activities, the Seventh Review Conference encouraged States parties to share forward looking information, to the extent possible,

- on planned international conferences, seminars, symposia and similar events dealing with biological research directly related to the Convention, and
- on other opportunities for exchange of scientists, joint research or other measures to promote contacts between scientists engaged in biological research directly related to the Convention,

including through the Implementation Support Unit (ISU) within the United Nations Office for Disarmament Affairs.

Confidence-Building Measure "A"

Part 1 Exchange of data on research centres and laboratories

At the Third Review Conference it was agreed that States Parties continue to implement the following:

"Exchange of data, including name, location, scope and general description of activities, on research centres and laboratories that meet very high national or international safety standards established for handling, for permitted purposes, biological materials that pose a high individual and community risk or specialize in permitted biological activities directly related to the Convention."

Modalities

The Third Review Conference agreed on the following, later amended by the Seventh Review Conference:

Data should be provided by States Parties on each facility, within their territory or under their jurisdiction or control anywhere, which has any maximum containment laboratories meeting those criteria for such maximum containment laboratories as specified in the latest edition of the WHO¹ Laboratory Biosafety Manual and/or OIE² Terrestrial Manual or other equivalent guidelines adopted by relevant international organisations, such as those designated as biosafety level 4 (BL4, BSL4 or P4) or equivalent standards.

States Parties that do not possess a facility meeting criteria for such maximum containment should continue to Form A, part 1 (ii).

¹ World Health Organization

² World Organization for Animal Health

Form A, part 1 (i)

Exchange of data on research centres and laboratories³

1. Instituto Nacional de Saúde Doutor Ricardo Jorge, I.P. (Portuguese National Health Institute) – INSA
2. Instituto Nacional de Investigação Agrária e Veterinária, I.P. (Portuguese Institute for Animal Health Research)
3. Departamento de Farmácia Galénica e Tecnologia Farmacêutica (DFGTF), Faculdade de Farmácia da Universidade de Lisboa (Department of Galenic Pharmacy and Pharmaceutical Technology, Faculty of Pharmacy, University of Lisbon)
4. Departamento de Microbiologia e Imunologia (DMI), Faculdade de Farmácia da Universidade de Lisboa (Department of Microbiology and Immunology, Faculty of Pharmacy, University of Lisbon)
5. Laboratório de Bromatologia e Defesa Biológica [Defence Research – Form A, part 2 (i)]
6. Instituto de Tecnologia Química e Biológica, Universidade Nova de Lisboa (Institute of Chemical and Biological Technology – New University of Lisbon)

³ The containment units which are fixed patient treatment modules, integrated with laboratories, should be identified separately.

1. INSTITUTO NACIONAL DE SAÚDE DOUTOR RICARDO JORGE, I.P. (PORTUGUESE NATIONAL HEALTH INSTITUTE) – INSA

Form A, part 1 (i)

Exchange of data on research centres and laboratories

1. Name(s) of facility⁴ Departamento de Doenças Infecciosas
2. Responsible public or private organization or company National Institute of Health Doutor Ricardo Jorge, I. P. (INSA) - public
3. Location and postal address Avenida Padre Cruz, 1649-016 Lisboa, PT
4. Source(s) of financing of the reported activity, including indication if the activity is wholly or partly financed by the Ministry of Defence
Funding comes from the Ministry of Health.
5. Number of maximum containment units⁵ within the research centre and/or laboratory, with an indication of their respective size (m²)
No (none) BSL4 Laboratories.
6. Scope and general description of activities, including type(s) of micro-organisms and/or toxins as appropriate

Form A, part 1 (ii)

If no BSL4 facility is declared in Form A, part 1 (i), indicate the highest biosafety level implemented in facilities handling biological agents⁶ on a State Party's territory:

⁴ For facilities with maximum containment units participating in the national biological defence research and development programme, please fill in name of facility and mark "Declared in accordance with Form A, part 2 (iii)".

⁵ In accordance with the latest edition of the WHO Laboratory Biosafety Manual, or equivalent.

⁶ Microorganisms pathogenic to humans and/or animals

Biosafety level 3 ⁷	YES
Biosafety level 2 ⁸ (if applicable)	YES

Any additional relevant information as appropriate:

⁷ In accordance with the latest edition of the WHO Laboratory Biosafety Manual and/or the OIE Terrestrial Manual or other equivalent internationally accepted guidelines.

⁸ In accordance with the latest edition of the WHO Laboratory Biosafety Manual and/or the OIE Terrestrial Manual or other equivalent internationally accepted guidelines.

2. **INSTITUTO NACIONAL DE INVESTIGAÇÃO AGRÁRIA E VETERINÁRIA, I.P. (R&D STATE LABORATORY OF THE MINISTRY OF AGRICULTURE)**

Form A, part 1 (i)

Exchange of data on research centres and laboratories⁹

1. Name(s) of facility¹⁰ **Instituto Nacional de Investigação Agrária e Veterinária, I.P. / Unit of Animal Health**
2. Responsible public or private organization or company **R&D state Laboratory of Agriculture Ministry
INIAV, I.P.**
3. Location and postal address **Oeiras – Avenida da República, Quinta do Marquês, 2784-505; and Vila do Conde – Vairão – R. dos Lagidos 4485-655**
4. Source(s) of financing of the reported activity, including indication if the activity is wholly or partly financed by the Ministry of Defence

All activities are supported by the Ministry of Agriculture and by Ministry of Finance. Some R & D activities are supported by the Foundation for Science and Technology (Ministry of Education and Science).

5. Number of maximum containment units¹¹ within the research centre and/or laboratory, with an indication of their respective size (m²)

No (none) BSL4- laboratories

6. Scope and general description of activities, including type(s) of micro-organisms and/or toxins as appropriate

The Instituto Nacional de Investigação Agrária e Veterinária, I.P. is a R&D State Laboratory of Ministry of Agriculture, situ in Oeiras (near Lisbon) and Vairão (Vila do Conde). The Laboratory's main activities are:

- Laboratory diagnosis of animal diseases, including zoonoses.**
- Performing R & D projects on diagnosis and epidemiology of animal diseases, including zoonoses.**

⁹ The containment units which are fixed patient treatment modules, integrated with laboratories, should be identified separately.

¹⁰ For facilities with maximum containment units participating in the national biological defence research and development programme, please fill in name of facility and mark "Declared in accordance with Form A, part 2 (iii)".

¹¹ In accordance with the latest edition of the WHO Laboratory Biosafety Manual, or equivalent.

Form A, part 1 (ii)

If no BSL4 facility is declared in Form A, part 1 (i), indicate the highest biosafety level implemented in facilities handling biological agents¹² on a State Party's territory:

Biosafety level 3 ⁷	YES
Biosafety level 2 ⁸ (if applicable)	YES

Any additional relevant information as appropriate:

- **1 Unit (68 m2) BSL 3 facility for TSE diseases, in Oeiras**
- **1 Unit (100 m2) BSL 3 Brucella and Mycobaterium, Lisbon**
- **1 Unit (65 m²) BSL 3 for rabies, Avain influenza, and others virus like Footh and Mouth disease**

And a total of 2000 m2 BSL2 for Veterinary Virologia, Bacteriology, Parasitology and Pathology, Including rooms for veterinary necropsy at the headquarters building in Oeiras near Lisboa (Portugal)

1 Unit (100m2) BSL 3 Brucella, Vila do Conde

And a total of 2300 m2 BSL2 for Food and feed Microbiology, Veterinary Bacteriology and Pathology, Including rooms for veterinary necropsy at Vairão's pole in Vila do Conde (North of Portugal)

Main activities of Instituto Nacional de Investigação Agrária e Veterinária, I.P. are R&D Public Laboratory of Agriculture Ministry, situ in Oeiras (near Lisboa) and Vairão (Vila do Conde) are:

- Execution of laboratory diagnosis of animal diseases, including zoonoses.
- Performing R & D projects on diagnosis and epidemiology of animal diseases, including zoonoses.

¹² Microorganisms pathogenic to humans and/or animals

Part 2 Exchange of information on national biological defence research and development programmes

At the Third Review Conference it was agreed that States Parties are to implement the following:

In the interest of increasing the transparency of national research and development programmes on biological defence, the States Parties will declare whether or not they conduct such programmes. States Parties agreed to provide, annually, detailed information on their biological defence research and development programmes including summaries of the objectives and costs of effort performed by contractors and in other facilities. If no biological defence research and development programme is being conducted, a null report will be provided.

States Parties will make declarations in accordance with the attached forms, which require the following information:

- (1) The objective and summary of the research and development activities under way indicating whether work is conducted in the following areas: prophylaxis, studies on pathogenicity and virulence, diagnostic techniques, aerobiology, detection, treatment, toxinology, physical protection, decontamination and other related research;
- (2) Whether contractor or other non-defence facilities are utilized and the total funding provided to that portion of the programme;
- (3) The organizational structure of the programme and its reporting relationships; and
- (4) The following information concerning the defence and other governmental facilities in which the biological defence research and development programme is concentrated;
 - (a) location;
 - (b) the floor areas (sqM) of the facilities including that dedicated to each of BL2, BL3 and BL4 level laboratories;
 - (c) the total number of staff employed, including those contracted full time for more than six months;
 - (d) numbers of staff reported in (c) by the following categories: civilian, military, scientists, technicians, engineers, support and administrative staff;
 - (e) a list of the scientific disciplines of the scientific/engineering staff;
 - (f) the source and funding levels in the following three areas: research, development, and test and evaluation; and
 - (g) the policy regarding publication and a list of publicly-available papers and reports.

Form A, part 2 (i)

National biological defence research and development programmes Declaration

Are there any national programmes to conduct biological defence research and development within the territory of the State Party, under its jurisdiction or control anywhere? Activities of such programmes would include prophylaxis, studies on pathogenicity and virulence, diagnostic techniques, aerobiology, detection, treatment, toxinology, physical protection, decontamination and other related research.

No

If the answer is Yes, complete Form A, part 2 (ii) which will provide a description of each programme.

3. DEPARTAMENTO DE FARMÁCIA GALÉNICA E TECNOLOGIA FARMACÊUTICA (DFGTF), FACULDADE DE FARMÁCIA DA UNIVERSIDADE DE LISBOA (DEPARTMENT OF GALENIC PHARMACY AND PHARMACEUTICAL TECHNOLOGY (DFGTF), FACULTY OF PHARMACY, UNIVERSITY OF LISBON)

Form A, part 1 (i)

Exchange of data on research centres and laboratories¹³

1. Name(s) of facility¹⁴ **Departamento de Farmácia Galénica e Tecnologia Farmacêutica (DFGTF)**
2. Responsible public or private organization or company **Faculdade de Farmácia da Universidade de Lisboa - public**
3. Location and postal address **Avenida Professor Gama Pinto, 1649-003 Lisboa-PT**
4. Source(s) of financing of the reported activity, including indication if the activity is wholly or partly financed by the Ministry of Defence

Funding comes from the Ministry of Education and Science, private entities and industry.

5. Number of maximum containment units¹⁵ within the research centre and/or laboratory, with an indication of their respective size (m²)

No BSL-4 Laboratories

6. Scope and general description of activities, including type(s) of micro-organisms and/or toxins as appropriate

Quatification of microorganisms of risk group 2 used in in vitro and in vivo assays.

Form A, part 1 (i)

If no BSL4 facility is declared in Form A, part 1 (i), indicate the highest biosafety level implemented in facilities handling biological agents¹⁶ on a State Party's territory:

Biosafety level 3 ⁷	YES
Biosafety level 2 ⁸ (if applicable)	YES

Any additional relevant information as appropriate: **One BSL-2 Laboratory with 20m²**

¹³ The containment units which are fixed patient treatment modules, integrated with laboratories, should be identified separately.

¹⁴ For facilities with maximum containment units participating in the national biological defence research and development programme, please fill in name of facility and mark "Declared in accordance with Form A, part 2 (iii)".

¹⁵ In accordance with the latest edition of the WHO Laboratory Biosafety Manual, or equivalent.

¹⁶ Microorganisms pathogenic to humans and/or animals

**4. DEPARTAMENTO DE MICROBIOLOGIA E IMUNOLOGIA (DMI),
FACULDADE DE FARMÁCIA DA UNIVERSIDADE DE LISBOA
(DEPARTMENT OF MICROBIOLOGY AND IMMUNOLOGY, FACULTY OF
PHARMACY, UNIVERSITY OF LISBON)**

Form A, part 1 (i)

Exchange of data on research centres and laboratories¹⁷

1. Name(s) of facility¹⁸ **Departamento de Microbiologia e
Imunologia (DMI)**
2. Responsible public or private organization or company **Faculdade de Farmácia da Universidade de
Lisboa - public**
3. Location and postal address **Avenida Professor Gama Pinto,
1649-003 Lisboa-PT**
4. Source(s) of financing of the reported activity, including indication if the activity is wholly or partly financed by the Ministry of Defence

Funding comes from the Ministry of Education and Science, private entities and industry.

5. Number of maximum containment units¹⁹ within the research centre and/or laboratory, with an indication of their respective size (m²)

No BSL-4 Laboratories

6. Scope and general description of activities, including type(s) of micro-organisms and/or toxins as appropriate

Isolation and characterisation of microorganisms of risk group 1, 2 and 3. In addition DMI has a few laboratories BSL-1 dedicated to teaching and diagnosis of human microbial pathogens.

Form A, part 1 (i)

If no BSL4 facility is declared in Form A, part 1 (i), indicate the highest biosafety level implemented in facilities handling biological agents²⁰ on a State Party's territory:

Biosafety level 3 ⁷	YES
--------------------------------	-----

¹⁷ The containment units which are fixed patient treatment modules, integrated with laboratories, should be identified separately.

¹⁸ For facilities with maximum containment units participating in the national biological defence research and development programme, please fill in name of facility and mark "Declared in accordance with Form A, part 2 (iii)".

¹⁹ In accordance with the latest edition of the WHO Laboratory Biosafety Manual, or equivalent.

²⁰ Microorganisms pathogenic to humans and/or animals

Biosafety level 2 ⁸ (if Applicable)	NO
--	----

Any additional relevant information as appropriate: **One BSL-3 Laboratory with 25m²**

5. LABORATÓRIO DE BROMATOLOGIA E DEFESA BIOLÓGICA

Form A, part 1 (ii)

If no BSL4 facility is declared in Form A, part 1 (i), indicate the highest biosafety level implemented in facilities handling biological agents²¹ on a State Party's territory:

Biosafety level 3 ⁷	YES
Biosafety level 2 ⁸ (if applicable)	YES

Part 2 Exchange of information on national biological defence research and development programmes

Form A, part 2 (i)

National biological defence research and development programmes Declaration

Are there any national programmes to conduct biological defence research and development within the territory of the State Party, under its jurisdiction or control anywhere? Activities of such programmes would include prophylaxis, studies on pathogenicity and virulence, diagnostic techniques, aerobiology, detection, treatment, toxinology, physical protection, decontamination and other related research.

YES

If the answer is Yes, complete Form A, part 2 (ii) which will provide a description of each programme.

Form A, part 2 (ii)

National biological defence research and development programmes

Description

1. State the objectives and funding of each programme and summarize the principal research and development activities conducted in the programme. Areas to be addressed shall include: prophylaxis, studies on pathogenicity and virulence,

²¹ Microorganisms pathogenic to humans and/or animals

diagnostic techniques, aerobiology, detection, treatment, toxinology, physical protection, decontamination and other related research.

LBDB only performs research in detection and decontamination of biological agents. No development programmes of national biological defence are being conducted.

2. State the total funding for each programme and its source.

28000€ for detection and 10000 for decontamination.

3. Are aspects of these programmes conducted under contract with industry, academic institutions, or in other non-defence facilities?

No

4. If yes, what proportion of the total funds for each programme is expended in these contracted or other facilities?

5. Summarize the objectives and research areas of each programme performed by contractors and in other facilities with the funds identified under paragraph 4.

6. Provide a diagram of the organizational structure of each programme and the reporting relationships (include individual facilities participating in the programme).

7. Provide a declaration in accordance with Form A, part 2 (iii) for each facility, both governmental and non-governmental, which has a substantial proportion of its resources devoted to each national biological defence research and development programme, within the territory of the reporting State, or under its jurisdiction or control anywhere.

Form A, part 2 (iii)

National biological defence research and development programmes

Facilities

Complete a form for each facility declared in accordance with paragraph 7 in Form A, part 2 (ii).

In shared facilities, provide the following information for the biological defence research and development portion only.

1. What is the name of the facility?

Laboratório de Bromatologia e Defesa Biológica

2. Where is it located (include both address and geographical location)?

Avenida Alfredo Bensaúde, 1849-012 Lisboa, Portugal

3. Floor area of laboratory areas by containment level:

BL2 **_30_** (sqM)

BL3 **_51_** (sqM)

BL4 **_00_** (sqM)

Total laboratory floor area **_81_** (sqM)

4. The organizational structure of each facility.

(i) Total number of personnel 10

(ii) Division of personnel:

Military 10

Civilian _____

(iii) Division of personnel by category:

Scientists 8

Engineers _____

Technicians 1

Administrative and support staff 1

(iv) List the scientific disciplines represented in the scientific/engineering staff.

Molecular biology, microbiology, immunology, parasitology, infectious disease and food science.

(v) Are contractor staff working in the facility? If so, provide an approximate number.

No.

(vi) What is (are) the source(s) of funding for the work conducted in the facility, including indication if activity is wholly or partly financed by the Ministry of Defence?

The funding is provided by the Ministry of Defence and some research projects by European Defence Agency and European Union.

(vii) What are the funding levels for the following programme areas:

Research 75%

Development _____

Test and evaluation 25%

(viii) Briefly describe the publication policy of the facility:

(ix) Provide a list of publicly-available papers and reports resulting from the work published during the previous 12 months. (To include authors, titles and full references.)

5. Briefly describe the biological defence work carried out at the facility, including type(s) of micro-organisms²² and/or toxins studied, as well as outdoor studies of biological aerosols.

The work carried out is related to the implementation of biosafety procedures, biodecontamination procedures and also with detection of biological agents.

²² Including viruses and prions.

**6. INSTITUTO DE TECNOLOGIA QUÍMICA E BIOLÓGICA,
UNIVERSIDADE NOA DE LISBOA (INSTITUTE OF
CHEMICAL AND BIOLOGICAL TECHNOLOGY – NEW
UNIVERSITY OF LISBON)**

Form A, part 1 (i)

Exchange of data on research centres and laboratories

1. Name(s) of facility²³ **_Instituto de Tecnologia Química e Biológica
António Xavier _**
2. Responsible public or private
organization or company **_Universidade Nova de Lisboa - public_**
3. Location and postal address **Avenida da República – 2780-157 Oeiras, PT**
4. Source(s) of financing of the reported activity, including indication if the activity is wholly or partly financed by the Ministry of Defence

All R&D activities are supported by the Foundation for Science and Technology (Ministry of Education and Science), the European Commission or other national and international science funding agencies.

5. Number of maximum containment units²⁴ within the research centre and/or laboratory, with an indication of their respective size (m²)

_____No (none) BSL4 Laboratories.

6. Scope and general description of activities, including type(s) of micro-organisms and/or toxins as appropriate

Scientific research at ITQB is partially dedicated to the characterisation of microorganisms, metabolomic, proteomic and microorganism-host relationships with plants, animals and human.

Form A, part 1 (ii)

If no BSL4 facility is declared in Form A, part 1 (i), indicate the highest biosafety level implemented in facilities handling biological agents²⁵ on a State Party's territory:

²³ For facilities with maximum containment units participating in the national biological defence research and development programme, please fill in name of facility and mark "Declared in accordance with Form A, part 2 (iii)".

²⁴ In accordance with the latest edition of the WHO Laboratory Biosafety Manual, or equivalent.

²⁵ Microorganisms pathogenic to humans and/or animals

Biosafety level 3	NO
Biosafety level 2 (if applicable)	YES

Any additional relevant information as appropriate:

Confidence-Building Measure "B"

Exchange of information on outbreaks of infectious diseases and similar occurrences caused by toxins

At the Third Review Conference it was agreed that States Parties continue to implement the following:

Exchange of information on outbreaks of infectious diseases and similar occurrences caused by toxins, and on all such events that seem to deviate from the normal pattern as regards type, development, place, or time of occurrence. The information provided on events that deviate from the norm will include, as soon as it is available, data on the type of disease, approximate area affected, and number of cases.

The Seventh Review Conference agreed the following:

No universal standards exist for what might constitute a deviation from the normal pattern.

Modalities

The Third Review Conference agreed on the following, later amended by the Seventh Review Conference:

1. Exchange of data on outbreaks that seem to deviate from the normal pattern is considered particularly important in the following cases:

- When the cause of the outbreak cannot be readily determined or the causative agent²⁶ is difficult to diagnose,
- When the disease may be caused by organisms which meet the criteria for risk groups III or IV, according to the classification in the latest edition of the WHO Laboratory Biosafety Manual,
- When the causative agent is exotic to a given geographical region,
- When the disease follows an unusual pattern of development,
- When the disease occurs in the vicinity of research centres and laboratories subject to exchange of data under item A,
- When suspicions arise of the possible occurrence of a new disease.

2. In order to enhance confidence, an initial report of an outbreak of an infectious disease or a similar occurrence that seems to deviate from the normal pattern should be given promptly after cognizance of the outbreak and should be followed up by annual reports. To enable States Parties to follow a standardized procedure, the Conference has agreed that Form B should be used, to the extent information is known and/or applicable, for the exchange of annual information.

3. The declaration of electronic links to national websites or to websites of international, regional or other organizations which provide information on disease outbreaks (notably outbreaks of infectious diseases and similar occurrences caused by

²⁶ It is understood that this may include organisms made pathogenic by molecular biology techniques, such as genetic engineering.

toxins that seem to deviate from the normal pattern) may also satisfy the declaration requirement under Form B.

4. In order to improve international cooperation in the field of peaceful bacteriological (biological) activities and in order to prevent or reduce the occurrence of ambiguities, doubts and suspicions, States Parties are encouraged to invite experts from other States Parties to assist in the handling of an outbreak, and to respond favourably to such invitations, respecting applicable national legislation and relevant international instruments.

Form B

Information on outbreaks of infectious diseases and similar occurrences, that seem to deviate from the normal pattern²⁷

1. Time of cognizance of the outbreak _____
2. Location and approximate area affected _____
3. Type of disease/intoxication _____
4. Suspected source of disease/intoxication _____
5. Possible causative agent(s) _____
6. Main characteristics of systems _____
7. Detailed symptoms, when applicable _____
 - respiratory _____
 - circulatory _____
 - neurological/behavioural _____
 - intestinal _____
 - dermatological _____
 - nephrological _____
 - other _____
8. Deviation(s) from the normal pattern as regards _____
 - type _____
 - development _____
 - place of occurrence _____
 - time of occurrence _____
 - symptoms _____
 - virulence pattern _____
 - drug resistance pattern _____
 - agent(s) difficult to diagnose _____
 - presence of unusual vectors _____
 - other _____
9. Approximate number of primary cases _____
10. Approximate number of total cases _____
11. Number of deaths _____
12. Development of the outbreak _____
13. Measures taken _____

²⁷ See paragraph 2 of the chapeau to Confidence-Building Measure B.

Confidence-Building Measure "C"

Encouragement of publication of results and promotion of use of knowledge

At the Third Review Conference it was agreed that States parties continue to implement the following:

Encouragement of publication of results of biological research directly related to the Convention, in scientific journals generally available to States parties, as well as promotion of use for permitted purposes of knowledge gained in this research.

Modalities

The Third Review Conference agreed on the following:

1. It is recommended that basic research in biosciences, and particularly that directly related to the Convention should generally be unclassified and that applied research to the extent possible, without infringing on national and commercial interests, should also be unclassified.
2. States parties are encouraged to provide information on their policy as regards publication of results of biological research, indicating, *inter alia*, their policies as regards publication of results of research carried out in research centres and laboratories subject to exchange of information under item A and publication of research on outbreaks of diseases covered by item B, and to provide information on relevant scientific journals and other relevant scientific publications generally available to States parties.
3. The Third Review Conference discussed the question of cooperation and assistance as regards the safe handling of biological material covered by the Convention. It concluded that other international forums were engaged in this field and expressed its support for efforts aimed at enhancing such cooperation.

Confidence-Building Measure "D"

(Deleted)

Confidence-Building Measure "E"

Declaration of legislation, regulations and other measures

At the Third Review Conference the States parties agreed to implement the following, later amended by the Seventh Review Conference:

As an indication of the measures which they have taken to implement the Convention, States parties shall declare whether they have legislation, regulations or other measures:

- (a) To prohibit and prevent the development, production, stockpiling, acquisition or retention of the agents, toxins, weapons, equipment and means of delivery specified in Article I of the Convention, within their territory or anywhere under their jurisdiction or under their control anywhere;

(b) In relation to the export or import of micro-organisms pathogenic to man, animals and plants or of toxins in accordance with the Convention;

(c) In relation to biosafety and biosecurity.

States parties shall complete the attached form (Form E) and shall be prepared to submit copies of the legislation or regulations, or written details of other measures on request to the Implementation Support Unit (ISU) within the United Nations Office for Disarmament Affairs or to an individual State party. On an annual basis States parties shall indicate, also on the attached form, whether or not there has been any amendment to their legislation, regulations or other measures.

Form E

Declaration of legislation, regulations and other measures

Relating to	Legislation	Regulations	Other measures ⁴	Amended since last year
(a) Development, production stockpiling, acquisition or retention of microbial or other biological agents, or toxins, weapons, equipment and means of delivery specified in Article I	Yes	Yes	No	No
(b) Exports of micro-organisms ²⁸ and toxins	Yes	Yes	No	No
(c) Imports of micro-organisms ¹¹ and toxins	Yes	Yes	No	No
(d) Biosafety ²⁹ and biosecurity ³⁰	Yes	Yes	No	No

²⁸ Micro-organisms pathogenic to man, animals and plants in accordance with the Convention.

²⁹ In accordance with the latest version of the WHO Laboratory Biosafety Manual or equivalent national or international guidance.

³⁰ In accordance with the latest version of the WHO Laboratory Biosecurity Guidance or equivalent national or international guidance.

Confidence-Building Measure "F"

Declaration of past activities in offensive and/or defensive biological research and development programmes

In the interest of increasing transparency and openness, States parties shall declare whether or not they conducted any offensive and/or defensive biological research and development programmes since 1 January 1946.

If so, States parties shall provide information on such programmes, in accordance with Form F.

Form F

Declaration of past activities in offensive and/or defensive biological research and development programmes

1. Date of entry into force of the Convention for the State Party.

15-05-1975

2. Past offensive biological research and development programmes:

- **NO**

- Period(s) of activities

- Summary of the research and development activities indicating whether work was performed concerning production, test and evaluation, weaponization, stockpiling of biological agents, the destruction programme of such agents and weapons, and other related research.

Nothing to declare.

3. Past defensive biological research and development programmes:

- **NO**

- Period(s) of activities

- Summary of the research and development activities indicating whether or not work was conducted in the following areas: prophylaxis, studies on pathogenicity and virulence, diagnostic techniques, aerobiology, detection, treatment, toxinology, physical protection, decontamination, and other related research, with location if possible.

Confidence-Building Measure "G"

Declaration of vaccine production facilities

To further increase the transparency of biological research and development related to the Convention and to broaden scientific and technical knowledge as agreed in Article X, each State party will declare all facilities, both governmental and non-governmental, within its territory or under its jurisdiction or control anywhere, producing vaccines licensed by the State party for the protection of humans. Information shall be provided on Form G attached.

Form G

Declaration of vaccine production facilities

1. Name of facility:

 2. Location (mailing address):

 3. General description of the types of diseases covered:
-
